## Space and Naval Warfare Systems Command Awards Contract

SAN DIEGO — Raytheon Co., Marlborough, Mass., is being awarded a \$14,457,449 not-to-exceed, cost-plus-incentive-fee letter contract for a two-phase effort that encompasses the design, development, test, production and requisite training of a military X-band kit for the Extremely High Frequency (EHF) low data rate/medium data rate follow-on terminal (FOT) submarine variant and Virginia Class variant. This contract includes options, which, if exercised, would bring the cumulative value of this contract to an estimated \$25,000,000. Work will be performed in Marlborough, Mass., and is expected to be completed by September 2007 (September 2009 if all options are exercised). Contract funds will not expire at the end of the current fiscal year. This contract was not competitively procured because it is a follow-on procurement to a competitively placed contract for the EHF terminals. The Space and Naval Warfare Systems Command, San Diego, Calif., is the contracting activity (N00039-05-C-0061).
